

DAMAR CHARTER ACADEMY

The Damar Charter School practices integrated pest management, a program which combines preventive techniques, non-chemical pest control methods and the appropriate use of pesticides with a preference for products that are the least harmful to human health and the environment. Applications of pesticides are made only when deemed necessary to control pest problem and after trying other means to control the problem. The term "pesticide" includes insecticides, herbicides, rodenticides and fungicides.

We are establishing a registry of persons who wish to be notified 48 hours prior to pesticides applications. To be included in this registry, please complete the attached form and return it to the school corporation headquarters.

Please include me in the notification registry. I understand that if there is an immediate threat to health or property that requires treatment before notification can be sent out, I will receive notification as soon as it is practical.

Parent/Guardian/Staff members name: _____

Signature: _____ Date: _____

Student's name: _____

Email address to send notification: _____

Please print, fill out, sign, and return this form via email to nicka@damar.org.
